INDUSTRIAL CLEANING, CLEANING PLANNING

Our company's specialists have more than 10 years of professional experience and detailed market knowledge in various cleaning areas. In addition, we can prove our experience and expertise with numerous references. We offer several solutions for the same cleaning task. We can make the work of our own cleaning equipment more effective by hiring a SPECIALIST CONSULTANT. As another option, with CLEANING ORGANIZATION, we take over the entire coordination of the task and guarantee effectiveness at the same time as cost savings. If required, we also carry out full-scale CLEANING in the case of daily, ad-hoc or regular large-scale cleaning and special work, using our efficient, modern tools and environmentally friendly cleaning products that we sell, and with the help of our well-prepared team.

INDUSTRIAL CLEANING IS THE MAIN PROFILE OF THE COMPANY

- we have the special tools needed to perform special tasks
- our employees are experienced professionals, so they finish in less time,
- we pay extra attention to the observance of occupational safety rules and the prevention of occupational accidents
- we carry out our work in an environmentally conscious way, in compliance with the relevant environmental regulations!

Cleaning of food industry plants, production lines, kitchens with 100% germ removal In the case of cleaning food industry facilities, disinfection is always a very important aspect in addition to cleaning, since very strict microbiological standards must be met in the case of food. In addition to organic and inorganic dirt and deposits, viruses, bacteria, spores, fungi and other pathogens must also be destroyed. We can provide perfect solutions in the following areas of the food industry:

- dairy industry
- meat industry and poultry processing industry canning industry
- milling industry and grain processing baking industry and confectionery sugar production
- confectionery industry
- vegetable oil industry

The specialists of our company have gained a lot of experience in the professional execution of very special works. We have all the qualifications, protective equipment and protective equipment necessary for safe work. It is very important to use the correct training and access points when working at height with lifting baskets, / scaffolding higher than 2 meters. Anyone who handles the machine and works on it at height must definitely have experience, occupational safety training, a medical examination, and the necessary machine operator's certificate.

Permits and devices are reviewed annually and reauthorized.

The purpose of public institution cleaning is to create and maintain a pleasant and spotless working environment. Depending on the size and nature of the area and the number of employees/customers, we develop the schedule of daily and periodic cleanings with the customer's needs in mind. As part of the daily and weekly cleaning of public institutions, we time the dust removal, the external cleaning of office machines, and the cleaning of the external surfaces of kitchen appliances in such a way as not to disturb the employees and customers, i.e. mostly before or after working hours.

In addition to the daily cleaning tasks, we also provide an on-call cleaner who removes unforeseen dirt (e.g. spilled coffee, soft drinks, etc.) and continuously cleans the walking surface of the communal areas in rainy/winter weather. The duty of the on-duty cleaner is also to supplement the daily cleaning tasks, e.g. by removing cobwebs, cleaning the edges of the floor, and everything that reduces the need for periodic (major cleaning) and makes the offices more beautiful.

During the general cleaning, the cleaning of doors, windows and their frames, the dust removal of apple trees, the cleaning of tiles, the cleaning of the surfaces under movable furniture with chemicals, the complete furniture cleaning and surface treatment, the cleaning of heaters with chemicals, the cleaning of upholstery and carpets, the cleaning of blinds and relaxa, we carry out the cleaning of ribbon and traditional curtains, as well as the interior cleaning of kitchen and other cabinets, as well as the refrigerator and microwave. In such cases, alpine cleaning will also take place, which may also affect the external surfaces of the building, as agreed.

- Major cleaning always takes place outside working hours (at weekends or at night).
- If required, we include the provision of hygiene products and tools (toilet paper, hand towels, liquid soap) in the contract price, or we undertake to deliver them to our customers at a favorable price.
- The agents, tools and machines used for cleaning are included in the cleaning price of the public institution, which is good because the customer can count on a fixed cost in advance, on an annual basis.
- Our prices include the regional manager and group leader assigned to the given area, as well as the number of cleaning staff depending on the size and nature of the area.
- Our colleagues represent a uniform image, which is also reflected in the work schedule and external signs (uniform work clothes).
- The cleaning agents we use comply with EU standards and regulations in all respects.
